

SCHOOL ATTENDANCE AREAS

The Board will determine attendance areas for the various schools of the District. Boundary lines will be recommended by the Superintendent, who will take into consideration the best use of school facilities, the equalization of enrollments in classrooms, natural barriers, and traffic hazards and patterns. Except as the foregoing factors influence boundary lines, the area established should permit each student to attend the school nearest his place of residence.

Students are expected to attend the school in the areas in which they live, with such individual exceptions as fall within the Board policy or may be made in the best interests of the student and/or the school.

[Adoption date: August 6, 1991]
