

ASSIGNMENT OF STUDENTS TO SCHOOLS

Normally each student will attend the school within the attendance area in which he lives.

Transfers

It is the objective of the Board to minimize transfers between schools. The many program specialties, options, and shared-time offerings in which students can be regularly enrolled should limit the need for school transfers.

Transfers must be requested through the Superintendent, who will determine whether a request is justifiable. Requests will be considered for the following reasons only:

1. When the physical health of a child is in danger, as certified by a physician. Such transfers will be continually monitored by the office of pupil personnel services.
2. When a change of address occurs during a school semester. In such instances, a permit to remain will be granted for the rest of the semester.
3. When a student has school discipline problems and is in need of a different educational setting, as determined by school authorities.

All transfers, regardless of reason, depend on the availability of space in the receiving school. All transfers are temporary and may be rescinded when the conditions for which the transfer was granted no longer pertain or for other good and sufficient reason. For reasons of consistency, the Superintendent will be the final authority in the issuance of transfers.
