

ADMINISTERING MEDICINES TO STUDENTS
(Use of Asthma Inhalers)

In order for a student to possess and use an inhaler, he/she must have written approval from the student's physician and parent or other caretaker. The principal and/or the school nurse must have received copies of these required written approvals.

The physician's written approval must specify the minimum following information:

1. the student's name and address;
2. the name of the medication contained in the inhaler;
3. the date the administration of the medication is to begin;
4. the date, if known, that the administration of the medication is to cease;
5. written instructions that outline the procedures school personnel should follow in the event that the asthma medication does not produce the expected relief from the student's asthma attack;
6. any severe adverse reactions that may occur to the student using the inhaler that should be reported to the physician;
7. any severe reactions that may occur to another student for whom the inhaler is not prescribed, should he/she receive a dose of the medication;
8. at least one emergency telephone number for contacting the physician;
9. at least one emergency telephone number for contacting the parent, guardian or other person having care or charge of the student in an emergency and
10. any other special instructions from the physician.

In no circumstances will the District, any member of the Board or any Board employee be liable for injury, death or loss of person or property when a District employee prohibits a student from using an inhaler because the employee believes, in good faith, that the required written approvals have not been received by the principal. Additionally, liability cannot accrue because the employee permits the use of an inhaler when the employee believes, in good faith, that the written approval(s) have been received by the appropriate authority.
