

PRELIMINARY DEVELOPMENT OF POLICIES

Proposals regarding District policies and operations may originate at any of several sources including parents, students, community residents, employees, Board members, the Superintendent, consultants, or civic groups. A careful and orderly process will be used in examining such proposals prior to action upon them by the Board.

Final action on such proposals, whatever their source, will be by the Board in accordance with its policy on policy adoption. The Board will take action on most matters on the basis of recommendations presented by the Superintendent. The Superintendent will base his recommendations upon the results of study and upon the judgement of the professional staff and study committees.

[Adoption date: August 6, 1991]
