

ENROLLMENT PROJECTIONS

Enrollment forecasts shall be prepared under the direction of the Superintendent or his designee, utilizing current enrollment information supplemented with data furnished by the appropriate planning offices. Methods of forecasting enrollment may include the following:

1. Public facility plan projections.
2. Periodic student census.
3. Principals' reports for current and projected enrollment.
4. Review and evaluation of proposed rezoning.
5. Review of approved builders' permits.
6. Information submitted by builders and developers.
7. Reports indicating anticipated and approved number of dwelling units resulting from submitted site plans.
8. Effect of phase-out program and growth trends in sending Districts.
9. Birth records.
