

PHYSICAL EDUCATION

The Board believes the District should provide education that is pertinent to the practical aspects of life, including instruction in student wellness practices. The Board promotes healthy schools by supporting wellness, which includes nutrition and physical activity instruction, as a part of the total learning environment.

A program of physical activity has substantial health benefits for students, including favorable effects on body weight, blood pressure, endurance capacity, and physical strength. In addition, physical activity promotes good academic outcomes, fosters student attendance, and helps increase a student's capacity for learning. The District promotes physical activity through structured classes in physical education and by encouraging students to develop healthy lifelong skills and interests in walking, biking, or other leisure time activities.

The Board directs the administration to provide opportunities for physical activity through physical education classes, recess periods, and cocurricular and extracurricular activities.
